

Clocks in a Box Synchronized Clock System

Think inside the Box.

Promote productivity, reliability & efficiency with precisely synchronized time keeping over multiple departments or work stations. The TTSync™ Clocks in a Box bundles together a wireless clock starter system. Ideal entry level package for schools, small healthcare facilities, manufacturing areas & office settings. Easily expandable & extremely simple to install.

- Captures main time source via Network Time Protocol (NTP) Server, GPS or Ethernet to ensure consistent, reliable time signal
- Wireless bundle uses dependable frequency-hopping technology to continuously broadcast time signal between 902MHz-928MHz (128 signaling channels) to unlimited number of clocks (analog or digital) with no interference & up to 250,000 square feet of coverage¹
- PoE bundle uses convenient, cost-effective Ethernet infrastructure
- Available in analog or digital clock formats (5 clocks in a box) to meet the needs of any environment
- TTSync™ wall clocks automatically search for time signal every 20 seconds (digital) or once per day (analog or LCD digital) to ensure consistently updated time
- TTSync™ software synchronizes wall clocks & additional TTSync™ Wireless RF Secondary Transmitters, & enables primary transmitter to be designated time source for TimeTrax™ Time & Attendance & Tone Systems to enhance productivity, reliability & efficiency throughout the workplace
- Automatically adjusts for Daylight Savings Time & keeps time during power outages eliminating the need for manual time adjustments
- Flexible mounting options, including dual clock wall & ceiling brackets for enhanced viewing in long hallways & large open spaces. Wire & weather guards also available. (sold separately)
- Easily expandable with additional TimeTrax Sync™ Wireless RF Secondary Transmitters or an unlimited number of clocks (sold separately)
